

Karaman Raw Mineral Deposits

Mine		Village	Grade		
Type	County	Location	Quality	Reserve	Other Information
Aluminum	Ayranci	Gerdekkirse	SiO ₂ :%2,2 Fe ₂ O ₃ :%31 TiO ₂ :%3,4	1.000.000 t. Probable 2.000.000 t.	The Ore Mineral is diasporit, but the field was abandoned. Reserve can be used as refractory and abrasive.
Iron	Ermenek	Kazanci Sarivadi			Iron mineralization, as well as Chromite and titanium are also seen.
Iron	Ermenek	Kazanci	Fe:%3-50	Visible 60.000 t.	Ore minerals are limonite and hematite. The production were active at the old years.
Lead-Zinc	Ermenek	Goktepe Mevliat mezar	Pb: %3,85 Cd: %0,01		The mineralization is settled at the weak zones of galena and sphalerite.
Barite	Merkez	Agacoba Village	BaO: %62	Appear	Inadequate Investigation
Bentonite Kaolen	Ermenek	Esentepe Village Kasimoglu Location.			Inadequate Investigation
Magnesite	Kazimkarabekir	Sodur (Sinci) Deveyatagi Kizilkirtepe Gokyataktepe	MgO: %46,6 SiO ₂ : %1,68 CaO: %1,35	Probable 3.480.000 t. Visible 197.500 t.	Filoniyel-type mineralization in serpentinized peridotites
Magnesite	Kazimkarabekir	Erentepe (Sodur)	MgO: %46,6 SiO ₂ : %1,68 CaO: %1,35	Probable 4.640.000 t. Visible 316.700 t	Similar properties
